TECHNICAL NOTE

CARRYOVER VOLUME CONFIGURATIONS

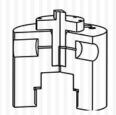

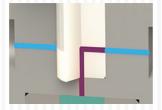

Innovative automation solutions

STANDARD CARRYOVER VOLUME

Competitors

LOW CARRYOVER VOLUME

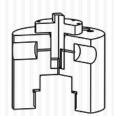

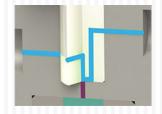

2.47 uL.

ULTRA-LOW CARRYOVER VOLUME

Valve design altered (two channels in the plug) to minimise the carryover volume inside the plug.
Carryover volume of **1.4 uL**.

WHAT ARE WE DOING?

Carryover volume up

to 50 uL.

The carryover volume is defined as the volume of liquid that will be mixed with the next liquid. It is not stuck, but will be swept next time a liquid passes.

We developed a special configuration to minimise the carryover volume in our syringe pumps, for specific applications that require close to no contamination.

WHAT'S IN IT FOR YOU?

- Limited contamination
- Multiple liquids
- Automation
- Small reagent quantities
