

# TECHNICAL NOTE

## LIQUID RECIRCULATION - LSPONE

Advanced  
MicroFluidics  
Innovative  
automation solutions

### WHAT ARE WE DOING?

Using a single LSPone, it is possible to create a system that recirculates the liquid in a single, all the while maintaining the flow in the same direction in your flow cell.

This can be multiplexed up to 6 times, either for 6 different liquids in a single flow cell, or for 6 flow cells with a single liquid.

### WHAT'S IN IT FOR YOU?

- Liquid economy
- Shear stress in the flow cell always in the same direction
- Automated system
- Flow control
